Editorial Note

This issue of *Electronic Journal of SADIO* (EJS) contains a select group of papers from the Decisioning 2022 Workshop, with a focus on discussion and knowledge exchange between academia and industry members.

Decisioning 2022 was the first workshop on Collaborative knowledge discovery and decision making: Applications to Sustainable Agriculture. It was organized by six research teams from Argentina, Chile, Colombia, and France to explore the current frontier of knowledge and applications in different areas related to knowledge discovery and decision making.

This first edition of Decisioning was held at the Faculty of Informatics of the National University of La Plata (UNLP) and organized by the LIFIA Research Center. It was held in mixed mode, virtual and face-to-face, on June 30 and July 1, 2022. The general chairs were Dr. Diego Torres (Universidad Nacional de La Plata - Universidad Nacional de Quilmes, Argentina) and Dr. Leandro Antonelli (Universidad Nacional de La Plata, Argentina).

We would like to express our special thanks to the members of the organizing committee: Dr. Alejandro Fernández (Universidad Nacional de La Plata, Argentina), Dr. Mario Lezoche (Université de Lorreine, France), Dr. Pascale Zarate (Université de Toulouse, France), Dr. Cesar Collazos (Universidad del Cauca, Colombia), Dr. Hernan Astudillo (Universidad Técnica Federico Santa María, Chile) and Dr. Regina Motz (Universidad de la República, Uruguay).

We also thank the members of the general committee for their dedication in the evaluation of the articles received and all those authors who sent their papers for evaluation.

We hope that the articles published here will be useful to the readers of this issue of EJS.
